

STATE OF COLORADO
DIVISION OF WATER RESOURCES
OFFICE OF THE STATE ENGINEER
1313 Sherman St., Ste 821, Denver, Colorado 80203
(303) 866-3581

INFORMATION FOR WELL PERMITS APPROVED PURSUANT TO CRS 37-90-105
(RESIDENTIAL, LIVESTOCK AND LIMITED COMMERCIAL USES IN DESIGNATED BASINS)

Carefully read the conditions of approval on the well permit. Those conditions and the information on this information sheet must be complied with in order for the permit to remain valid.

THE WELL CONSTRUCTION WORK MUST BE COMPLETED PRIOR TO THE EXPIRATION DATE OF THE PERMIT. THE PERMIT EXPIRATION DATE IS TWO YEARS FROM THE DATE ISSUED. Evidence of well construction must be submitted to this office in the form of a well construction report from the contractor showing that construction was completed prior to expiration of the well permit.

The permit number is located in the upper right hand corner of the permit. The expiration date is located in the lower right hand corner.

The expiration date may be extended at the discretion of the Commission for good cause shown. If you desire an extension, you must file a written request with this office **prior to the expiration date**. The request must state why the well has not been completed, must include an estimate of time required to complete the well, and must specify the length of extension you desire, not to exceed one (1) year. There is no filing fee for the extension.

The well must be constructed and the pump installed by contractors with current license(s) issued by the State of Colorado unless exempted as described on the reverse side. The well construction and pump installation reports must be submitted to the office of the State Engineer within sixty (60) days of completion of the work or within seven days after expiration of the permit, whichever is earlier. Your contractor must provide you with a copy of the work report(s) they have filed with the State Engineer. The Well Construction and Test Report (Form No. GWS-31) and Pump Installation and Test Report (Form No. GWS-32) are available from the Division of Water Resources offices, or from our website at www.water.state.co.us. Additional information regarding well construction, pump installation, and well plugging are found on the reverse side of this sheet.

Keep a copy of this permit for your records. The official digital image of the permit is on file in the Denver office Records Section. You may view or print the entire permit file using our online well permit search tool: <http://www.dwr.state.co.us/WellPermitSearch/> Hard copies of permit documents may be obtained from our Records Section for a fee of 50 cents per page. Statutes require that any change of mailing address or ownership be reported to the State Engineer. Form number GWS-11 is used both by new owners to report ownership changes and current owners to report address changes.

If you have questions, contact Staff of the Commission at the Denver Office, or to a limited extent the local Ground Water Management District where your well is located.

The well must be constructed in compliance with the Water Well Construction Rules (2 CCR 402-2) unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors. The Water Well Construction Rules are available from our offices or our website at www.water.state.co.us. The rules cover the minimum well construction and pump installation standards, disinfection requirements, well plugging standards and contractor licensing regulations.

Any well to be plugged must be plugged in accordance with Rule 16 of the Water Well Construction Rules. A Well Abandonment Report (Form No. GWS-9) must be submitted to confirm the plugging and sealing of the well. This form is available from our offices or our website at www.water.state.co.us.

Well construction and pump installation by the well owner. You may construct the well and/or install the pump yourself if the well is entirely for your own use, is on property you own, and is constructed and/or pump equipment is installed with equipment owned and operated by you. **It will be your responsibility** to complete and submit the Well Construction and Test Report (Form No. GWS-31) and/or the Pump Installation and Test Report (Form No. GWS-32). These forms are available from our offices or our website at www.water.state.co.us. If you are constructing your own well or installing your own pumping equipment, it is recommended that you obtain a copy of the Water Well Construction Rules for reference.

The permit may require installation of a totalizing flow meter to measure all withdrawals from the well. As a minimum, the meter shall be installed according to manufacturer's recommendations and shall contain sufficient recording digits to assure that "roll over" to zero does not occur within three years, and shall be read annually. The meter shall be maintained by the permittee so as to provide continuous, accurate records of withdrawal. If the meter is not operational, the well shall not be pumped. The Commission may approve a substitute totalizing measuring device if it is capable of recording or can be used to calculate the total volume pumped. The permittee shall report the amount of withdrawal from the permitted well as reasonably required by the Commission.
